LIST OF APPROVED MODELS OF FRAMES AND FORKS

Version on 13.05.2016

The Approval Procedure of bicycle frames and came into force on 1 January 2011 in accordance with Article 1.3.001bis of the UCI Regulations.

From this date, all new models of frames and forks used by licence holders in road (RD), time trial (TT), track (TR) and cyclo-cross (CX) events must be approved on the basis of the Approval Protocol for Frames and Forks available from the UCI website.

Approval by the UCI certifies that the new equipment meets the shape requirements set out in the UCI regulations. However, this approval does not certify in any case the safety of the equipment which must meet the applicable official quality and safety standards, in accordance with Article 1.3.002 of the UCI regulations.

The models which are subject to the approval procedure are:

- all new models of frames and forks used by licence holders in road, track or cyclo-cross events,
- all models of frames and forks under development on 1 January 2011 which had not yet reached the production stage (the date of the order form of the moulds is evidence),
- any changes made to the geometry of existing models after 1 January 2011.

Models on the market, at the production stage or already manufactured on 1 January 2011 are not required to be approved during the transition stage. However, the non-approved models have to comply in any case with the UCI technical regulations (Articles 1.3.001 to 1.3.025) and are subjects to the commissaires decision during events.

At the end of the approval procedure, the names of the approved models of frames and forks, together with the manufacturer's name, the sizes checked, the date of the approval, the category involved and the identification code are added to the List of Approved Models of Frames and Forks, available from the UCI website. This list will be updated whenever new models are approved.

The use of approved models is permitted in competition from the date of approval. The use of approved frames and forks remains subject to Article 1.3.007.
